Conscious gifts

Jute, most commonly known as “gold fibre” is one of the largest and most used natural fibres in most textile applications. Jute fibre is 100% biodegradable and recyclable; therefore, it is eco-friendly. A hectare of jute plants can reduce up to 15 tones of carbon dioxide and releases up to 11 tones of oxygen. When burnt, jute does not generate toxic gas.

Cotton is one of the most common natural fibres in the world, it is a white and vegetal origin fibre, made around the cotton plant seeds. This natural resource is one of the most used in textile industry, in form of threads or fabrics. It is very versatile, and cotton is also known for its comfort given by its twisted shape made on the threading process.

Green future

The sustainable development can respond to the contemporaneous generation's necessities, without compromising future generations.

Reduce, reuse and recycle

Conscious gifts

RECYCLED CARDBOARD – recycling old paper aims to utilize cellulosic fibres from papers and cardboards used to produce new paper. It is an important factor in economic and social terms, for its contribution to conserve the natural and energetic resources and for the protection of the environment, as it is the most adequate way to reduce landfill waste disposal.

CORK is 100% natural raw material, with unique properties that confine an unequalled character. It is light, waterproof and gasproof, its elastic and compressible, excellent thermal and acoustic isolator and recyclable. Cork is extracted from cork trees every 9 years, without cutting any tree during the process. With this material we can create many products, from the most traditional, to most innovative and inspiring.

BAMBOO is a vegetal material, like cotton and linen. Its fibre is extracted from a cellulosic paste and it identifies by its homogenic and heavy characteristics, it has a smooth and shiny look, like silk, and it has respiratory and anti-bacterial virtues. Bamboo has also lignified stems which are used to manufacture many items, such as music instruments, furniture, baskets, even in construction.
